Curb weight (kg)	2460
Maximum full load mass (kg)	3080
Number of drive motors	2
Motor layout	front rear
Battery Type	Ternary lithium battery
Battery energy (KWh)	40.9
Electricity consumption per 100 kilometers (kWh/100km)	
Fast charging function	Yes
Fast charging power (KW)	75

Our Product Introduction

Fast charging time (hours)	0.5
Drive mode	four wheel drive
four-wheel drive	Electric four-wheel drive

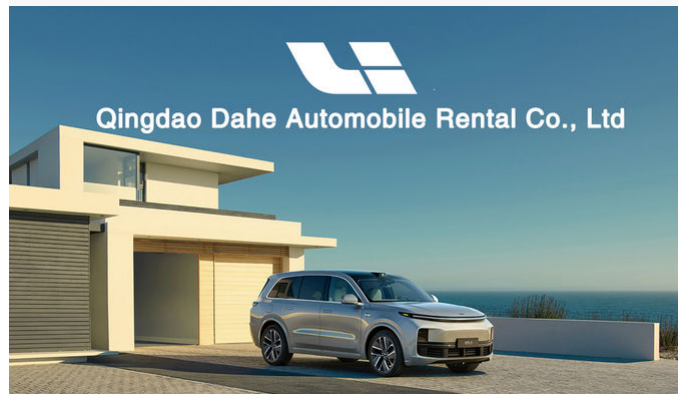

The **LEADING IDEAL L7** is an extremely popular large luxury SUV in China renowned for its compelling qualities. Its standout feature is the lack of range anxiety - when the gasoline runs low, it switches to electric power, and charges using electricity when the batteries run low.

The official rated range is around 1100km, but in actual use it can often go even further by another 200-300km. Not only is the range exceptional, the L7 also boasts superlative configurations that surpass gasoline vehicles with intelligent driving features and a blistering 0-100km/h time of 5.3 seconds for an SUV of its size.

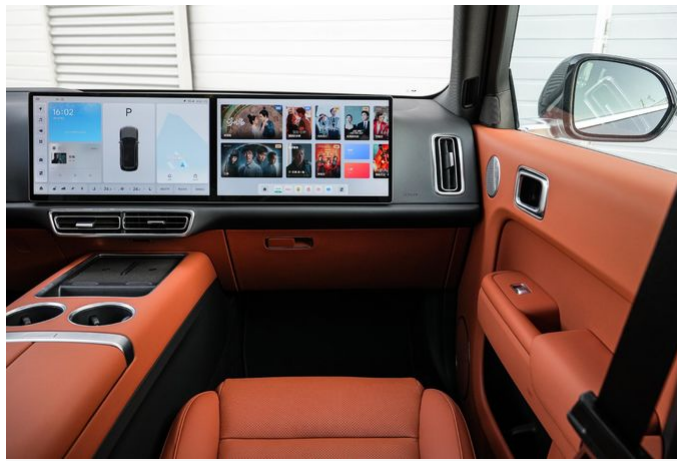

Sales volumes exceed 20,000 vehicles per month. The enormous interior space and low fuel consumption have made it the top choice for those prioritizing practicality and economy. Coupled with its unmatched specs, its runaway success is little surprise. Finally, the attention to details and driving joy delivered help drivers fully unwind instead of feeling stressed, cementing its stellar reputation. In short, just one test drive is enough to appreciate its intelligent and cossetting qualities that make the LEADING IDEAL L7 a standout choice.
