Product Description

BEIJING MINI electric truck is suitable for urban logistics, with a range of 140KM and a load of 475KG.

The explosive growth of urban logistics requires higher and higher efficiency of logistics distribution, which brings great challenges to the cost and environment of transportation. In addition, as the proportion of urban distribution teams tends to be younger, practitioners have also put forward more requirements for the comfort of transportation vehicles. The new energy "flagship" small truck has a youthful and personalized product positioning, which can

Our Product

meet user needs in an all-round and multi-dimensional manner, and adapts to the needs of various urban logistics and transportation scenarios such as daily necessities and supermarket distribution.

As a commercial vehicle, it is an excellent seed player with strong explosive power and at the same time it can give users a sense of security. It adopts a non-load-bearing body, a mid-mounted rear-drive driving method, a 2.5T-level light truck rear axle with a peak torque of 270N.M, and the same level of high-strength graded steel plates and other hardware configurations. It has high transmission efficiency, sufficient power, and It has strong cargo capacity and high safety level. There is also software support such as ABS anti-lock braking, braking force distribution, and reversing imaging.
