### Product Description

Geely Geometry G6, a cheaper Geely electric sedan, has a range of 410KM-500KM. High cost performance, suitable for UBER

This is the 2024 Geometry G6 pure electric sedan. As a facelift model, the new car has undergone minor design changes.

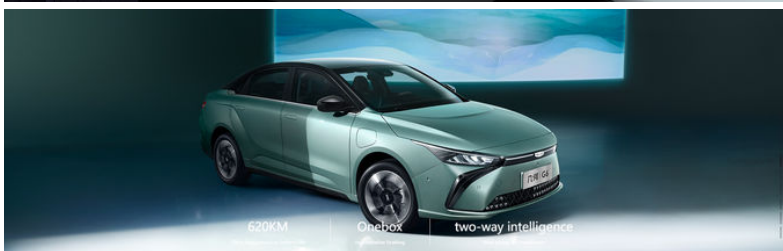

Positioned as a sedan, Geometry G6 measures 4752/1804/1503mm, with a 2700mm wheelbase. The car runs on 17-inch wheels and comes standard with hidden door handles. In addition, the design of the rear remains unchanged.

Our Product

Power comes from a permanent magnet synchronous motor that outputs either 150 kW and 310 Nm or 100 kW and 180 Nm. The 0 – 100 km/h acceleration time is 6.9 seconds. In addition, its battery pack adopts the CTP (cell-to-pack) technology with a cylindrical architecture, giving the car two cruising range options of 500 km and 410 km. Geely claims that charging from 30% to 80% takes only 20 minutes and that charging for 8 minutes can achieve a 100 km battery life.

Inside, the interior largely remains unchanged with a 10.2-inch instrument panel, a 14.6-inch central control screen, and a flat-bottom three-spoke steering wheel. A new dark green interior color is added.

Furthermore, in terms of safety, the 2024 Geometry G6 is equipped with 13 advanced driving assistance functions including adaptive cruise control, automatic emergency braking, and traffic sign recognition.

Super battery life

Comprehensively create a real sense of battery life security

#### Super electric intelligent driving assistance

All series are equipped with L2 intelligent driving assistance as standard

#### Light language future design

Pure electric exclusive identity, a call at a glance

#### Super electric smart cockpit

Easily "enjoy" seamlessly connected smart life
