Product Description

DENZA N7 Cost-effective and inexpensive family SUV with Mercedes pedigree in China, with a good battery quality

As a medium-to-large SUV, the Denza N8 measures 4949/1950/1725mm, and the wheelbase is 2830mm. From the side, the roof is slightly curved, and the blackened pillars create a suspended effect. The door handle adopts a conventional design, instead of the popular pop-out design.

Inside, the interior has a 15.6-inch touch screen, a double-spoke flat-bottom multifunctional steering wheel, and a floating full LCD instrument panel.

Additionally, the sound system comes from Dynaudio speakers. Built upon the modified BYD e-platform 3.0, all iterations of the Denza N7 incorporate a consistent 91.3kWh LFP Blade battery pack. Denza asserts that RWD models achieve a commendable range of up to 702 kilometers, while AWD models naturally offer a slightly shorter range of 630 kilometers.

Equipped with two DC fast charging sockets, the Denza N7 accommodates the simultaneous connection of two charging guns. Opting for the single gun mode results in a maximum charging capacity of 150kW, with the addition of a second gun enabling the Denza N7 to draw up to 230kW. Employing the dual gun charging configuration, the Denza N7 boasts the ability to cover 350 kilometers within 15 minutes or an impressive 100 kilometers in just four minutes.

Brand Name	Denza
