Product Description

Neta Aya, a cheap 5-seater electric small SUV. Battery life is 318KM-401KM. Get Your Money's Worth!

As mentioned, the Neta Aya is a facelift of the Neta V. Frankly saying, its exterior design hasn't got a lot of changes. We can highlight the more aggressive front bumper with a bigger trapeze-shaped air intake. From the back, the Aya has a single taillight unit and slightly adjusted rear bumper. Speaking about the dimensions of the Neta Aya, they are 4070/1690/1540 mm with a wheelbase of 2420 mm. So, they weren't changed.

The interior of the Neta Aya continues the design language of the Neta V. It has the same two-spoke 'sporty' steering wheel, a portrait-oriented 14.6-inch screen, a thin 12-inch instrument panel and minimalistic styling. But it has a noticeable change. It is the new black-white color scheme. Previously, the Neta V had only black and pink interior shades. It is interesting that the Aya adopts the MT8675 chip from MediaTek. Its performance is similar to the 8155 processor from Qualcomm.

The Neta Aya has two powertrain versions. The first one is represented by a 40-kW (54 hp) electric motor and an LFP battery from Guangxi Ningfu for 318 km of range (CLTC). Here, we will mention that previously Neta V used LFP and NMC batteries from CATL, the top-tier battery manufacturer in China. As for the Guangxi Ningfu, it is a relatively young company that was launched in 2021. So, it looks like a step backwards for Neta.

The second powertrain version of the Neta Aya has a 70-kW (95 hp) electric motor and an LFP battery from SVOLT for 401 km of CLTC range. Here, we will mention that the SVOLT is a relatively well-known battery maker. So, it will be a solid choice to buy the Aya with a bigger battery from the supplier with more extensive experience in the sphere.
