Product Description

The current Hongqi H5 sedan debuted back in 2017 and has been updated several times over the years. The Hongqi H5 is based on the same platform as the third-generation Mazda 6, which was made in China by the FAW-Mazda joint venture. FAW, or First Auto Works, is also the owner of the Hongqi brand. The current H5 is available with two engines: a 170 hp 1.5 turbo and a 197 hp 1.8 turbo, both developed by FAW.

Coming back to the new Hongqi H5, it has design cues from the H9 and the look remains subtle while leaning over to the aggressive side. The headlights are matched with the waterfall grille to create a luxurious impact. A sunken waistline design has been adopted by giving a high front and a low back.

Its length, width, and height are 4987*1874*1465mm, with a wheelbase of 2920mm.

The Hongqi H5 comes equipped with the Hongqi Zhilian 3.0 system that adds safety features to the car. It includes SABB advanced cruise, automatic parking, 360 camera system, automatic parking, and remote car functions control. Users will be able to find the car, operate air conditioning, and access other limited functions via the mobile app.

Three power options will be available in the Hongqi H5, 1.5T, 2.0T, and a hybrid. The 1.5 turbo engine has the power of 115kW/156hp and a peak torque of 258Nm. Next, the 2.0 Turbo comes with 165kW/224hp, a maximum torque of 340Nm, and 8-speed automatic transmission.

The hybrid variant comes with 140kW (190 horsepower) which offers incredibly low fuel consumption of 4.8L/100km under WLTC conditions.

Specification

Manufacturer	FAW Hongqi
level	mid-size car
Energy type	gasoline
time to market	2023.08
engine	2.0T 224 horsepower L4
Maximum power(kW)	165(224Ps)
Maximum torque (N·m)	340
gearbox	8-speed manual transmission
Length x width x height (mm)	4988x1875x1470
Body structure	4-door, 5-seat sedan
Maximum speed (km/h)	230
Official acceleration time to 100 kilometers (s)	7.8

WLTC comprehensive fuel consumption (L/100km)	6.4
engine model	CA4GC20TD-33
Displacement (mL)	1989
Displacement(L)	2
Intake form	turbocharging
Engine layout form	horizontal
Cylinder arrangement	L
Number of cylinders (number)	4
Number of valves per cylinder (number)	4
Air Supply	DOHC
Maximum horsepower (Ps)	224
Maximum power(kW)	165
Maximum power speed (rpm)	5500
Maximum torque (N·m)	340
Maximum torque speed (rpm)	1650-4500
fuel form	gasoline
fuel grade	95#
Fuel supply method	Direct injection in cylinder
Cylinder head material	aluminum
Cylinder material	aluminum
Cylinder head material	aluminum
Cylinder material	iron
