Product Description

Song L is the best-looking BYD car so far. The SUV fastback sits on an all-electric e-platform 3.0 and packs many BYD technologies, including the Disus-C suspension system, CTB (cell-to-body) battery integration technology, and an active rear wing. It also has frameless doors, hidden door handles, and 20" wheels.

It is the latest model in the Dynasty series and is closely related to Denza N7, which shares the same platform. It measures (L/W/H) 4840/1950/1560 mm, with a wheelbase of 2930 mm. That is 90mm longer and 64 mm shorter (height) than the Tesla Model Y.

Inside, the BYD Song L has a 15.6" floating rotatable screen and a 10.25" LCD instrument panel behind the steering wheel. There is also a 50" head-up display (AR-HUD), and the new generation DiLink system.

Song L comes in five versions, which are consistent with pre-sales versions; only the price was lowered:

***Exceed Version 550 km**

189,800 yuan (26,700 USD), -30k yuan or -4.2k USD (compared with the presale price)

150 kW motor, 71.8 kWh battery

***Excellence Version 550 km**

199,800 yuan (28,100 USD), -40k yuan or -5.7k USD (compared with the presale price)

150 kW motor, 71.8 kWh battery

***Exceed Version 662 km**

209,800 yuan (29,500 USD), -30k yuan (compared with the presale price)

230 kW motor, 87.04 kWh battery

***Excellence Version 662 km**

229,800 yuan (32,300 USD), -30k yuan (compared with the presale price)

230 kW motor, 87.04 kWh battery

***Excellence Version 602 km 4WD**

249,800 yuan (35,200 USD) -30k yuan (compared with the presale price)

380 kW motors, 87.04 kWh battery

The EV has three powertrain options: 150 kW with 310 Nm torque, 230 kW with 360 Nm torque (both RWD), and AWD 380 kW with 670 Nm peak torque. Battery options are two, 71.8 kWh and 87.04 kWh, both in-house developed LFP Blade batteries. The top trim level of Song L with 380 kW (510 hp) dual motors can accelerate 0-100 km/h in 4.3 seconds.
